I. Introduction to the 1996–97 NCES Common Core of Data (CCD) Public Elementary and Secondary Education Agencies

The Common Core of Data (CCD) Nonfiscal surveys consist of data submitted annually to NCES by state education agencies (SEAs) in the 50 states, the District of Columbia, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, the Virgin Islands, and the Department of Defense. In order to provide data comparable across states to the maximum extent feasible, common data items and definitions have been developed and accepted by NCES and representatives of SEAs over a period of time from the 1950's to the present. CCD data are sent to NCES by SEA personnel acting as CCD coordinators, are edited and maintained in machine-readable data sets by NCES, and are used to produce general-purpose publications and specialized reports.

The principal users of CCD Nonfiscal data are the Federal Government, the education research community, state and local government officials, including school boards and LEA administrators, and the general public.

The purpose of the Common Core of Data (CCD) Nonfiscal surveys is to provide a listing of all schools (90,070) and agencies (16,376) providing free public elementary and secondary education in the United States and its outlying areas, along with basic descriptive statistical information on each unit listed. It includes all public agencies providing free public elementary and secondary education to children. (Some SEAs do not provide information on education outside of the traditional public school system.)

This data set contains 16,468 records, one for each public elementary and secondary education agency in the 50 states, District of Columbia, five outlying areas and the Department of Defense dependent schools outside of the United States. Agencies that were open on last year's files (1995-96), but are closed for the 1996-97 school year (92) are kept on the file for one year. They are indicated by a value of 2 under the variable BOUND96 on the agency file. Once these closed agencies are stripped off the file, a file of 16,376 agencies open in 1996-97 will remain. Of the 16,376 open local education agencies, 14,846 are regular local school districts, 1,165 are supervisory unions or regional educational centers, 194 are state-operated agencies, and 171 are Federally-operated or other agencies.

The CCD system was developed and is designed to be inclusive rather than exclusive. In accordance with this purpose, CCD files contain a substantial number of records representing administrative and operating units which are unlike typical public schools and school districts. The CCD system provides features which enable the data provider and the data user to identify and select records according to the categories of interest to them. Definitions and categories used in the CCD are deliberately generic so that they may accommodate the many and varied organizational structures used in the provision of public elementary and secondary education across the nation.

Education Agency Universe data include NCES and state identification numbers, agency name, address, phone, county, agency type (regular school district, component of supervisory union, headquarters of supervisory union, regional educational service agency, state-operated agency, Federally operated agency, and other), metropolitan status, Metropolitan Statistical Area (MSA) code if applicable, number of students (ungraded/PK-12), number of pupils with special education IEPs, number of high school completers (regular diploma/other diploma/other completers), plus any data from the school universe. (In 1992-93 staff and grade 7-12 dropout data were added.)

The remainder of this document contains a User's Guide and six appendices. The User's guide contains information on methodology including certain conditions that are unique to the data file.

Appendix A — Record Layout gives the variable names and labels of the data elements discussed throughout the documentation, as well as their location on the data file.

Appendix B — Imputation Flag Frequencies indicates the number of states for which any data item was imputed.

Appendix C — Glossary defines all of the CCD data items.

Appendix D — Agency Nonresponse Tables report data and count of records with zeros for the data items.

Appendix E — State Notes provide comments for data users on individual states.

Appendix F — Agency Universe Shuttle is the paper copy of the school survey form.

II. User's Guide

A. Methodology

Information at all levels of aggregation--school, agency, and state--is provided to NCES by officials in each state education agency. Since it is understood that local education staff have already provided information to SEA officials in conjunction with established administrative records systems, it is not the policy of CCD survey staff to contact local personnel for data verification except in unusual circumstances. Certain edits are performed by survey staff and referred to SEA respondents for resolution. It is CCD policy to accept the judgment of the respondent unless there is a clear conflict or unacceptable inconsistency. Appendix E provides information on when and how the data files were submitted by each state.

Although every public school must be administered by an education agency, it is not true that every education agency must operate schools. Some agencies provide support to other agencies and do not have teachers or students permanently assigned to them. In the event that a student is served by more than one agency, there may be some question about where to count the student's membership. This decision is left up to the reporting officials unless it becomes clear to CCD staff that CCD

survey rules are not being properly applied.

Comments for Users of the Data File

Users of the data set need to be aware of certain conditions that are unique to the data file.

Undercoverage and Vertical Consistency - Although CCD coverage of traditional public schools and school districts (those schools and districts typed as regular) is virtually 100 percent, the same cannot be said for publicly funded education outside of the traditional settings and organizations. There are states that do not report schools for the deaf and blind, university lab schools, and other schools not covered by the authority of the state education agency. Conversely, when these institutions are reported on the school and agency universes, the students and teachers may not be included in the count of persons for whom the state assumes responsibility in its official report.

Longitudinal Consistency - Although longitudinal consistency is a key principle of CCD, it is impossible for NCES to guarantee that state coordinators follow CCD conventions with regard to the deletion of closed schools or agencies and the addition of new ones. Confusion is particularly likely when agencies are merged.

Imputation Flag Options - Care has been taken to provide a meaningful entry in every cell of this data set. In order to achieve this result, it was necessary in some cases for NCES to assign a value other than that reported—including a blank response—by the state coordinator responding to the CCD surveys. For each data cell there is a companion cell containing a flag indicating whether the figure in the cell was reported by the state or was placed in the cell by NCES using one of several methods.

R - As reported by the state

A - Adjustment

P - Imputation Based on prior years data

I - Imputation based on a method other than prior years data

T - Total based on sum of internal or external detail

C - Combined with data provided elsewhere by the state

N - Not applicable

On the record layout, the companion cell is identified by the name of the original data cell preceded by an “I”. The documentation explains any action taken by NCES in regard to each variable. A frequency distribution of the values of each imputation flag is attached in appendix B and appendix D contains nonresponse tables.

Missing Value Options - All data elements are either completed by the state or they have been filled with “0”, “M”, or “N”.

0 - There are no occurrences of this data element. A value was expected and measured, but there were 0 (zero) cases found in the category. (For example, a district having no graduates would report 0)

M - Data are missing. A value was expected and none was measured. (For example,

a district that has at least one high school graduate but can not measure the number of graduates would report M.)

N - Data are not applicable. A value was neither expected nor measured. (For example, an elementary school district would report N for high school graduates.)

FIPS Codes – Federal Information Processing Standards. A list of the FIPS codes is attached. (The Common Core of Data Public Education Agency and School Universe used the “old” FIPS codes for the outlying areas prior to the 1991-92 survey year.)

(A01) NCES Education Agency ID - Each record contains a unique NCES agency identification number.

(A02) State Education Agency ID - Each record contains a state agency identification number.

(A03) Name of Education Agency - Each record includes an agency name. NCES reviewed any record filling the 30 characters assigned, and may have adjusted the agency name to improve readability (e.g., applied standard abbreviations).

(A04) Mailing Address - A total of 84 agencies did not have a street address; the largest numbers were in Montana (37 agencies) and Iowa (16 agencies). Some valid mailing addresses consist solely of a city and state, indicated by an “N” in the street address field.

(A05) City - Each record contains a city name in the address. There are valid cases in which an agency may be located in one city and have a mailing address in another city.

(A06) State (PO Abbreviation) - Each record has a two-letter postal office code indicating the state in which the agency’s mailing address is located. There are valid cases in which an agency may be located in one state and have a mailing address in another state. These situations have been confirmed by the reporting state. There are 14 agencies in the 1996-97 Education Agency Universe that reported mailing addresses in a different state from the state abbreviation. A list is included.

(A07) Zip Code + 4 - Each record contains a valid zip code.

(A08) Area Code + Telephone Number - Telephone numbers were reported as “M” for 44 agencies, and 30 agencies were reported as not having a telephone number.

(B01) Education Agency Type Code - Each record has an education agency type code. Although agencies classified as supervisory union administrative centers (Type 3) generally do not report student membership, Massachusetts and Illinois are exceptions, and report students in membership for such agencies. See the *Instructions for Completing the Nonfiscal Surveys of the Common Core of Data 1996-97* for a detailed definition of each of these codes.

(B02) Supervisory Union ID - Supervisory union identification codes are expected for all supervisory union components (Type 2) and supervisory unions (Type 3) agencies.

(B03) FIPS County Code - Each record contains a valid FIPS county code and corresponding county

name. A small number of supervisory unions in New England states have a FIPS county code that differs from the county in which the agency is physically located.

(B04) CMSA/PMSA/MSA Code - Each record has a valid entry for this field. A value in this field indicates that the agency's address is associated with a large population nucleus designated by the U. S. Government as a metropolitan statistical area (MSA). If the agency is not in any type of metropolitan statistical area the field is zero filled. For all states but New England, the assignment was made using a file of FIPS county codes matched to metropolitan area codes. For the New England states, the assignment was made using a file of zip codes matched to metropolitan area codes. The metropolitan area definitions used were those issued by the Office of Management and Budget (OMB) as of June 30, 1996.

(B05) Metropolitan (Metro) Status Code - Each record contains a valid metro status code. For those local education agencies matching to a metropolitan area, a "1" or a "2" was assigned. Metro status "1" was assigned if the name of the city in the mailing address matched the central city; otherwise the agency was assigned a "2". All agencies not matching to a metropolitan area were assigned a "3".

(B06) Boundary Change Indicator - All agencies are coded to reflect their status as reported for the 1996-97 school year. The valid responses include:

- 1 - No change from last report
- 2 - Education agency closed with no effect on another agency's boundaries
- 3 - New agency formed with no effect on another agency's boundaries
- 4 - Action taken to create, close, or modify this agency has affected the boundaries of at least one other agency

(C01) Ungraded Membership - Ungraded students are reported as "N" for states in which students are not assigned to this grade category.

(C02) Prekindergarten-Grade 12 Membership - There are valid agency records that do not include students. Some regular school districts contract with other agencies to provide services for some students rather than operate schools for these students directly. These student counts are not reported for the receiving district to avoid duplication. Conversely, in cases where all services are provided by a contracting district, no student counts are reported for the sending district. Student counts are also not generally attributed to supervisory union administrative centers or regional education service agencies.

(C03) Special Education IEP - Individually written instructional plan for students with disabilities designated as special education students under IDEA-Part B.

(C04, C05, C06) Graduates: Regular Diploma Recipients, Other Diploma Recipients, Other High School Completers - The Public Education Agency Universe collects data on three types of completion credentials. C04 and C05 combined give the total number of regular degrees conferred in a given state. Some states also grant a certification of attendance or completion in lieu of a diploma, as reported in C06.

(D01 - D108) Dropout Information by Grade (7-12), Race/Ethnicity and Sex - The dropout count was introduced in the 1992-93 CCD. In 1996-97 twenty-nine states and Puerto Rico used the NCES

dropout definition and collection procedure. NCES adjusted the dropout counts to “M” for the remaining states/territories.

(E01 - E08) Prekindergarten Teachers, Kindergarten Teachers, Elementary Teachers, Secondary Teachers, Teachers of Ungraded Classes, Total FTE Teachers, Instructional Aides and Instructional Coordinators and Supervisors - These data items were added to the Public Education Agency for the 1992-93 school year, having been reported previously only at the state level. Not all states are able to report each of these items.

(F01) Elementary Guidance Counselors, Secondary Guidance Counselors, Total Guidance, Librarians/Media Specialists, Librarians/Media Support Staff, LEA Administrators, LEA Administrator Support Staff, School Administrators, School Administrator Support Staff, Student Support Services Staff, All Other Support Staff - These data items were added to the Public Education Agency for the 1992-93 school year, having been reported previously only at the state level. Not all states are able to report each of these items.

Derived Variables - Grade span of the agency and number of schools in each agency are not collected as part of the Public Education Agency Universe. However, since these are often useful data for analysis, those data were derived from the individual school records on the Public School Universe file.

a. The grade span was derived by first summing the enrollment by grade for all schools associated with each agency. Then, the lowest grade and the highest grade with any student count were determined.

b. For number of schools and total classroom teachers, the data represent the total number of school records associated with each agency record and the sum of the classroom teachers reported for each of those school records. This is not necessarily the total number of teachers employed by the agency, since some teachers may not be assigned to a particular school.

(000) Grade Span of Agency - This variable is constructed from the school universe records. It represents the lowest and highest grade for which membership was reported by any school affiliated with the agency.

(000) Number of Schools - This variable is constructed from the Public School Universe and sums the number of schools on that file affiliated with the agency.

(000) FTE Teachers - This variable is constructed from the Public School Universe. It sums the FTE teachers reported on that file for schools affiliated with the district. FTE teachers are reported to the nearest tenth on the Public School and Agency Universe. This is not necessarily the total number of teachers employed by the agency, since some teachers, often those providing special education or services to homebound students, may not be assigned to a particular school. Thus FTE counts may be less than the total teacher counts obtained from agency staff reports for each state.

Appendix C is a glossary of the definitions of the variables on the dataset.

Anomalies: Not Applicable Data: Sch - Ungraded Students; Agy - Ungraded Students. Due to a difference in coding methods between NCES and Florida it was necessary to change some school type codes. The Florida Department of Education expects that the school totals will be higher than the State totals on the cross file consistency report because they include totals from the University Laboratory Schools. These unique schools are not required to report data electronically to the Department of Education data base which is where the State totals are derived.

Georgia

Date Received: 5/30/97

Submission: Internet

Anomalies: Not Applicable Data: Sch - Ungraded Students; Agy - Ungraded Students and Ungraded Teachers. Beginning with the 1995-96 data files the classification of elementary teachers was shifted from PK-7 to PK-5 and the classification of secondary teachers was shifted from 8-12 to 6-12. Georgia allows for 6 ethnic race categories for students, the five in CCD plus the multi-racial category. They independently reclassify the multi-racial category for reporting CCD data.
